## GUI DESIGN QUIZ

### Section a

- 1) It combines creativity with problem-solving to guide users
- 2) the design might look good but fail to connect with the user and it must support the goal you want to achieve
- 3)
- 4) flat design uses simple two dimension elements while material design makes interface looks more interactive
- 5) they give the feedback to the user
- 6) users will be confused because it breaks their natural expectations.
- 7) it ensures that **people with disabilities** can still use and understand the product.
- 8)

### Section b

1(a). designing a food delivery Order Now button

Use an attention-grabbing color like orange (linked with appetite). Apply contrast so it stands out from the background.

(b) feedback when users press it: show a spinner and display "Ordering..." to confirm their action was received.

2. two fixes: Add a clear icon and label, e.g., a camera or "Upload your photo."

Use visual hierarchy to draw attention.

3. A vector logo is made from scalable shapes. It can be resized for business cards without losing quality, while a photo-based logo becomes hard to print.

4. It ignores contrast and visibility \Fix it by increasing contrast, and ensuring buttons look distinct from the background.

### Section c

#### No. Answer

- 1 B
- 2 C
- 3 B

**No. Answer**

4    **B**

5    **A**

6    **B**

7    **A**
