

Assignment Title: Painted Sketch Design for UI

Module: SPEGI302 – User Interface Design Level 3

Instructor: Niyongabo Emmanuel

Total Marks: 20

Duration: 1 Week

Assignment Overview

Create your **own sketch** and bring it to life by **applying color, shading, and texture** in **Adobe Illustrator or Photopea**. This task helps you practice digital painting techniques to make your design realistic, appealing, and suitable for use in a user interface (UI).

Task Instructions

1. **Create a Sketch (Original Work)**
 - Draw your own original sketch (can be UI elements, icons, or a simple scene).
 - It must be clean and clearly structured.
2. **Digitize & Paint in Adobe Illustrator or Photopea**
 - Import or trace your sketch digitally.
 - Apply **base colors** using the *Color Picker* or *Swatches*.
 - Use **color harmony** and contrast effectively.
3. **Add Shading for Depth**
 - Show **light and shadow** using opacity and blending options.
 - Make your flat shapes appear more 3D.
4. **Apply Texture for Realism**
 - Add subtle **textures or brush effects**.
 - Keep textures neat and not overpowering.
5. **Finalize Your Composition**
 - Adjust balance, color mood, and overall layout.
 - Export your final painted sketch as a JPG/PNG for submission.

Grading Criteria (Total 20 Marks)

Criteria	Description	Marks
1. Original Sketch & Creativity	Unique idea, well-composed sketch design	4
2. Color Application	Proper use of color harmony, contrast, and mood	4
3. Shading & Lighting	Realistic depth through highlights and shadows	4
4. Texture & Detailing	Appropriate and balanced use of textures	4
5. Overall Composition & Presentation	Clean layout, good balance, ready for UI context	4
Total		20 Marks
